Quarx!

Quarx is a line of flexible furnishings, appropriately sized and styled for young readers. It introduces bright colors and playful elements into library environments, while promoting literacy and lifelong learning to young readers.

It is designed from the ground up to be flexible, colorful, and cost effective while adding exciting configurations to Brodart's offering.

Quarx adds flexibility to any library by utilizing many different accessories that are interchangeable throughout the shelving units. Metal tabs on the back of every piece make it easy to attach or detach shelves, panels, and boxes to the frame for a different look or functional needs. The tabs are designed to make it easy for an adult to adjust pieces, but difficult enough so a child can't.

Quarx offers four different types of shelves:

Full Width Display Shelf and **Half Width Display Shelf**: Designed to feature a book with the cover facing outward to entice young readers. The shelves offer a 1½" lip in the front with a 1¾" shelf depth.

Full Width Storage Shelf and a **Half Width Storage Shelf**: Designed to store books with the spines facing outward so readers can see the titles. Storage Shelves maximize space utilization. The shelves offer a 10" shelf depth.

A **Showcase Box** is another way to feature a specific book or other objects. Display Boxes are 14"W, 14"H, and offer a 10"D shelf space.

Quarx also offers two different types of Panels to support learning and play. The **Activity Panel** is compatible with standard building bricks. The **Dry Erase Whiteboard Panel** can be used to offer encouraging words for the day, feature a specific title or author, or for kids to create whatever their minds can dream up.

Quarx Accessories

- For use with any Quarx Shelving Unit
 - Mix and match to suit your needs and aesthetic preferences
- Built to order. Assembled. Ships from manufacturer.
